

curol⁺

Breathe well, Live well

curol+
mission

A solution to **CURE ALL** breathing problems indoors and outdoors.

Helping all humanity live in a cleaner and better environment indoors and outdoors preventing and reducing aerosols and airborne disease stimulants.

We will help to manage your ecosystem.

curol+

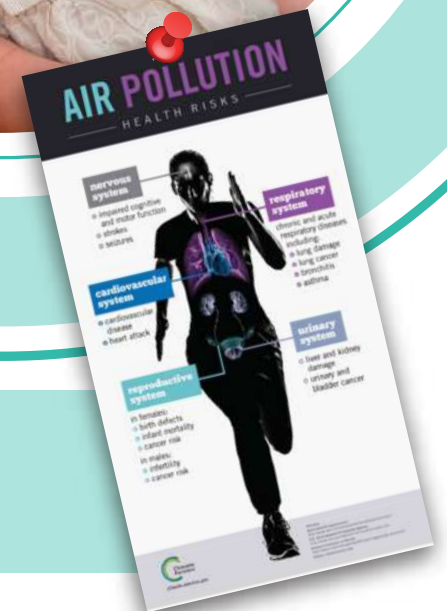

Curol+ A liquid-based surface cleaning product that aims to 'CURE ALL' dust and air pollution related problems.

Curol+ is a gamechanger in removing the airborne particles inside the rooms which carry viruses and infection along with dust mites.

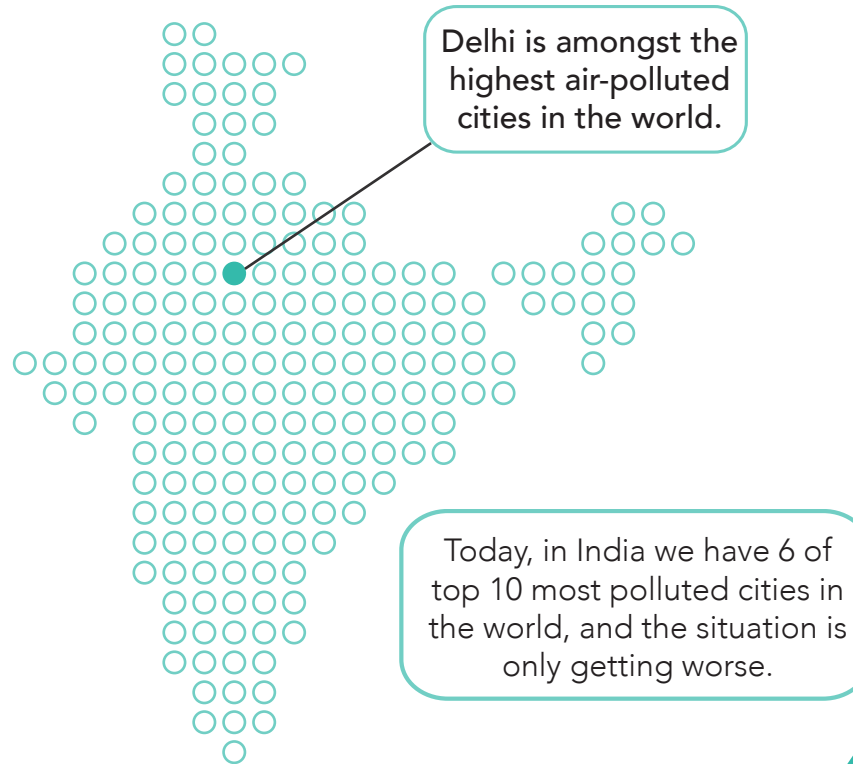

Curol + is a dust binding product that shall reduce the sand and dust to fly in outdoor environment.

Is your Indoor AIR Safe for your baby?

Why curol+ ?

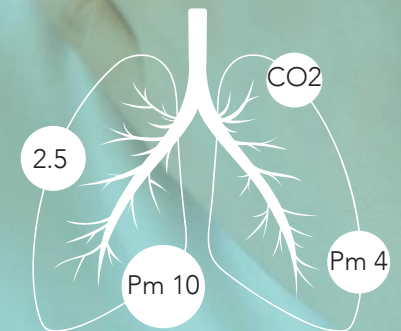

We can reduce sand, dust & aerosols in your ecosystem.

The global world is struggling with unknown viruses and the problem becomes acute with air pollution and **Curol+** can help reduce both Outdoor and Indoor air pollution.

Millions of people die each year due to air pollution, and indoor air pollution is the second highest killer in India.

Respirable Suspended Particulate Matter (RSPM) is the main ambient and indoor air pollutant.

It's Getting Worse.

The Price of Air Pollution

A study published by the World Bank in 2016 revealed that air pollution cost India approximately 8% of its GDP or \$560 billion in 2013, as a result of lost productivity due to premature mortality and morbidity. Imagine the figures now!

Rapid Urbanization in the world are promoting increased energy and fuel consumption resulting in higher air pollution levels outdoors and indoors.

Lower Life Expectancy

Lower Immune System

Lower Productivity

The price of outdoor dust and air pollution is so large specially in the United Arab Emirates reducing quality of life.

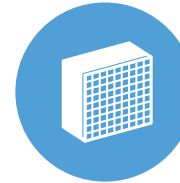

Current Available Solutions for Indoor Air Pollution

AIR - PURIFIERS

- + Expensive
- + Reduction in efficiency over time, approx. 3 months
- + Non tangible results
- + Limitations of coverage area

HEPA FILTERS

- + Extremely expensive
- + Require replacement every 3 months
- + Difficult to install
- + Cant be added to existing HVAC's
- + Cannot be implemented in every area

AIR-PURIFYING PLANTS

- + Not efficient enough
- + Non tangible results
- + More Psychological
- + Non Measurable

- + Strong expensive and highly chemical binders and regular watering.

Current available Dust and
Particulate matter reduction

Our Story

Curol + is a patented product originating from the pristine Nordics. A Scandinavian Inventor, friend and a partner who created for India, Asia and the Middle East a product specially to bring the purity and clean air of the Nordics. The invention born from a health necessity and global wellbeing is a boon for the Indian Sub Continent and the Middle East .

Curol + comes from the House of Fusion Group largely into Textile Exports, World class Gaming Entertainment, International Trade and Sustainability benchmarking industries and now sustainability for the environment both Indoors and Outdoors.

A joint venture between Denmark and Indian business houses seeking a solution for the masses, A solution to the Outdoor dust and the Indoor Air Quality and Dust related airborne diseases and Air quality crisis in general.

A product that is a life saver for dust ridden countries, it will give them a safer environment to breathe in.

The underlying belief that this product will be a boon and shall benefit all the mass of population across economic and political strata's of the Indian sub continent and the Middle East to start with.

Curol shall be the magical cure for your indoors
Curol shall bring a magical solution to the outdoors as well.
